Course Objective:

These sessions are geared toward training AES-*IntelliNet* customers to fully utilize the capabilities of the system as well as learn to install, manage and maintain the system.

Course Content:

During training the technical, management and maintenance aspects of the products will be presented and interactively discussed with a concentration on the components currently utilized by the customers in attendance. This includes UL Fire and Security applications. In addition, the proper installation of each unit is presented in a "hands-on" approach by our experienced AES-*IntelliNet* technicians to help avoid system problems due to installation errors. Each participant will also have access to learn and try all AES-*IntelliNet* products including software, receivers and subscriber transceiver units.

Location:

The training sessions are conducted in the AES Corporate headquarters located at 285 Newbury Street (Route 1) in Peabody, MA., approximately 30 minutes north of Boston.

Cost:

There is no charge for factory training for AES Customers; however travel, lodging and meals with the exception of lunch (provided by AES) are the responsibility of the customer.

Travel & Accommodations:

Air travel is available into Boston, MA and Manchester, N.H. Because of the 9am start time, please plan to arrive the day before your training begins and plan on staying two nights. We recommend the following hotel for close proximity. When booking rooms request the AES rate (\$74/night):

Springhill Suites by Marriott
43 Newbury Street US 1 North
Peabody, MA 01960
Telephone: (978) 535-5000

Please reserve your spot for the AES training session early! Space is limited to maximize the benefit to all attendees. However, we encourage each company to send as many employees as possible. To register, contact Julie Hickey at jhickey@aes-intellinet.com or call (978) 535-7310 ext. 133 to indicate the number of attendees from your company and their names so we can check for availability and hold the space for them.

Please let us know as soon as possible when you can attend as reservations are required.

*Note training is for the DOS Systems and the new Linux based MultiNet System. Day One will be the MultiNet training, Day Two is common to both systems and Day Three - DOS. Please pick the two days you require for the system you manage.

Sincerely,

Julie Hickey, Office Administrator
AES Corporation
